OD IDEJE DO RJEŠENJA

Lacuna grupa je internacionalna kompanija koja u svom poslovanju objedinjuje **razvoj, proizvodnju, doradu, prodaju, distribuciju i promociju**.

Naše iskustvo i stalna interakcija s tržištem omogućuju nam da se fokusiramo na potrebe klijenata, te u suradnji s njima razvijamo naše proizvode.

Kada stvaramo našu odjeću vodimo računa da ona zadovolji 4 kriterija: da u takvoj odjeći možete sigurnije i/ili lakše obaviti radni zadatak pred vama (**FUNKCIJA**), zatim da odjeća pruža omjer uloženog i dobivenog s kojim ćete vi biti zadovoljni (**KORISNOST**), da vam se dopada (**IZGLED**) te da ju dugo možete nositi, a da tkanina nije promijenila svojstva (**DUGOTRAJNOST**).

Cilj nam je profesionalnim pristupom, kvalitetnim proizvodima i inovativnim rješenjima osigurati prvenstveno sigurnost i zaštitu te zadovoljstvo i udobnost na radom mjestu i u slobodno vrijeme.

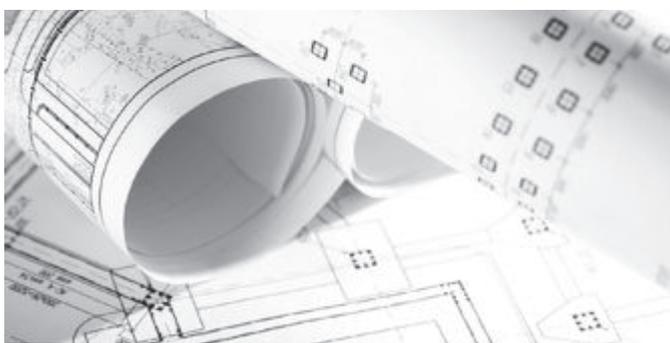

FROM IDEA TO SOLUTION

Lacuna Group is an international company that integrates **development, production, finishing, sales, distribution and promotion in its business**.

Our experience and constant interaction with the market enable us to focus on the needs of our customers and in cooperation with them we develop our products.

While creating our clothes, we make sure that it meets 4 criteria: that your performance of a task is safer and/or easier in our clothing (**FUNCTION**), that the clothing provides the ratio of the invested and obtained you will be satisfied with (**BENEFITS**), that you like it (**APPEARANCE**) and that you will wear it for the long time while the fabric keeps the same properties (**LONG LASTING**).

Our goal is to provide, through our professional approach, quality products and innovative solutions, first and foremost safety and protection, as well as pleasure and comfort at work and leisure.

RAZVOJ

U razvoju proizvoda vodimo računa o potrebama klijenta i tako dolazimo do svih onih detalja koji čine gotov proizvod. Koristeći suvremene alate zajedno s vama razvijamo vaš identitet od ideje do gotovog proizvoda. Konstrukcija naše radne odjeće prati prirodne pokrete tijela u radu, što odjeći daje udobnost i funkcionalnost. Možda bi vam se dopao izgled naše radne odjeće?

Mi vjerujemo da dobar izgled proizlazi iz funkcionalnosti, udobnosti i naravno sigurnosti svakog odjevnog predmeta kao i pridavanju pažnje detaljima.

PROIZVODNJA

Ključni faktor u ispunjenju naših ciljeva je **vlastiti proizvodni pogon i razvojni centar** koji se geografski nalaze u samom srcu Europe.

DORADA

Gotov proizvod, nastao u interakciji s tržištem, dodatno prilagođavamo svakom pojedinom klijentu. Bilo da se radi o tisku na tkaninu (sito tisak i digitalni tisak) bilo da se radi o strojnom vezu (štik). Kod nas, u Lacuni, ponudit ćemo **cjelovit paket koji odgovara vašem korporativnom brandu.**

DEVELOPMENT

In product development we take into account customer needs and so come to all those details that makes the finished product. Using contemporary tools together with you, we develop your identity from the idea to the finished product. The design of our workwear follows the natural movements of the body in work, which makes the clothes comfortable and functional. **comfort and functionality. Maybe you liked the look of our work clothes?**

We believe that good looks come from the functionality, comfort and of course the safety of every garment item as well as attention to details.

MANUFACTURING

A key factor in fulfilling our goals is **our own manufacturing facility and development center**, that is geographically located **in the very heart of Europe.**

FINISHING

The finished product, created in interaction with the market, is additionally adapted to each individual client, whether it be printing on the fabric (screen printing and digital printing) or machine embroidery. We at Lacuna offer **a complete package that matches your corporate brand.**

TKANINA

Visokokvalitetni materijali su bit svakog našeg proizvoda. Materijali koje koristimo moraju imati visoka tehnička svojstva kao i svojstva visoke izdržljivosti i udobnosti.

U proizvodnji koristimo materijale i dodatke koji odgovaraju tom proizvodu, pazeći na tehnička svojstva materijala kao i njegovo porijeklo te svojstva u smislu zaštite okoliša:

TenCate® – Specijalizirane tehničke zaštitne tkanine (TecaWork®, TecaSafe®, TecaPro®)

CORDURA® – Materijali otporni na habanje

KEVLAR® – Vlakna otporna na visoke temperature.

Carewear UV® – Prirodni materijali s utkanom UV zaštitom UPF 40+

YKK® patent zatvarači

Organski pamuk + Tencel – materijal izuzetno ugodan za nošenje, obazriv prema okolišu, samoodrživ, sa efektom hlađenja i svojstvom ubrzanog sušenja

FABRIC

High quality materials are the essence of each our products. The materials we use must have high technical properties as well as high endurance and comfort properties.

In manufacturing, we use the materials and accessories corresponding to this product, taking into account the technical properties of the material as well as its origin and environmental properties:

TenCate® – Specialized Technical Protective Fabrics (TecaWork®, TecaSafe®, TecaPro®)

CORDURA® – Wear-resistant materials

KEVLAR® – High temperature resistant fibers

Carewear UV® – Natural UV resistant UVF protection 40+

YKK® patent fasteners

Organic Cotton + Tencel – Extremely comfortable wearing material, environmentally friendly, self-sustainable, with cooling effect and fast drying properties

CERTIFIKATI

Prije nego isporučimo proizvod uvjerimo se da ima sve potrebne certifikate za namjenu za koju će se upotrebljavati te da je pravilno označen u skladu s pravnim propisima i normama koji se na njega odnose te na taj način ispunjavamo sve tehničke uvjete koje nalaže zakon za nesmetano odvijanje poslovanja.

LOGISTIČKA PODRŠKA

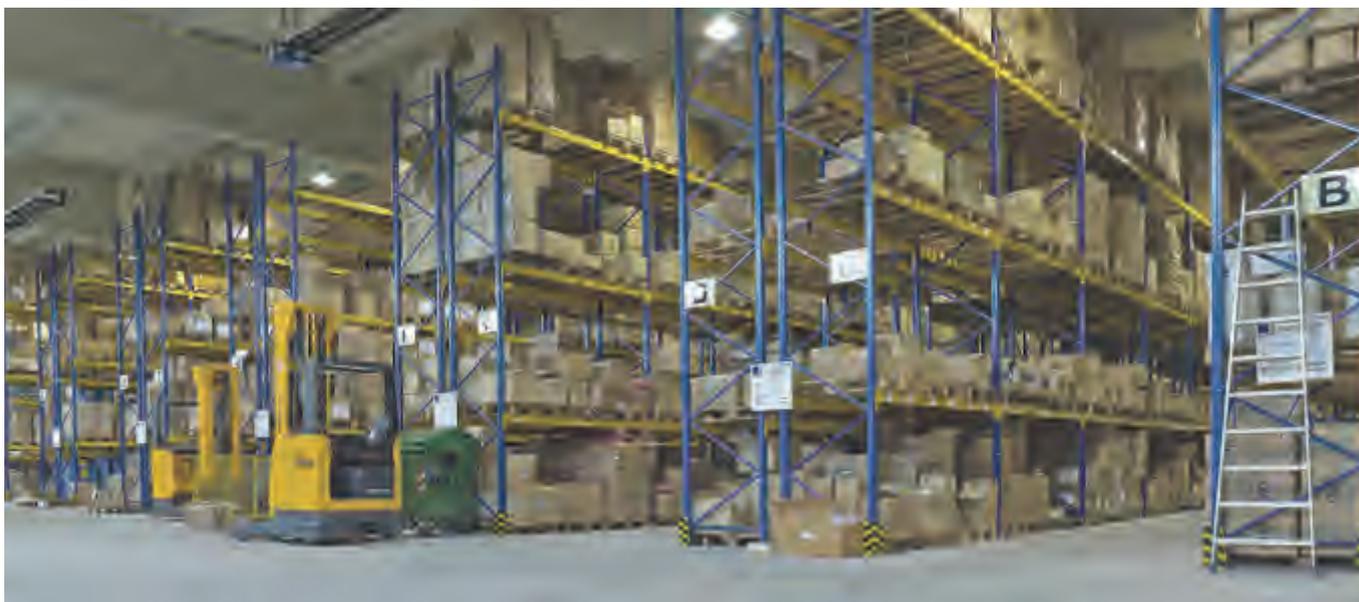

Odmah pored proizvodnog pogona nalazi se logističko distributivni centar veličine 4000 m² s više od 3500 paletnih mjesta što nam omogućuje svakodnevnu isporuku robe vlastitim voznim parkom i uz pomoć logističkih partnera.

CERTIFICATES

Before delivering the product, we make sure that it has all the necessary certificates of intended use and that it is properly marked in accordance with the applicable legal regulations and standards, and thus meeting all technical requirements stipulated by the law for uninterrupted business conduct.

LOGISTICS SUPPORT

Next to the production plant there is a 4000 m² logistics and distribution centre with more than 3500 pallet positions, which enables us to provide daily delivery of products in our own fleet vehicles and with the help of logistic partners.

LACUNA
WORKTIME

ODJEĆA / DIZAJNIRANA ZA UDOBNOST I SIGURNOST

Lacuna WORKTIME radna odjeća, sinonim je za sigurnost, zaštitu i udobnost. Konstrukcija naše radne odjeće prati prirodne pokrete tijela u radu, što odjeći daje udobnost i funkcionalnost.

Pri izradi se koriste samo materijali visokih tehničkih performansi koji pri tome imaju svojstva izdržljivosti i udobnosti nošenja.

WORKWEAR / DESIGNED FOR COMFORT AND SAFETY

Lacuna WORKTIME work wear, is a synonym for safety, protection and comfort. The design of our Workwear follows the natural body movements in work, which gives comfort and functionality.

The materials we use must have high technical, endurance and comfort properties.

KOLEKCIJA ALARA

Alaru karakterizira pročišćen dizajn, uži kroj koji ne umanjuje udobnost već omogućuje slobodne pokrete tijela u radu te suzdržana paleta boja. Kolekcija Alara prepoznata je u različitim industrijama kako zbog svoje funkcionalnosti, kvalitete materijala tako i zbog izgleda.

ALARA COLLECTION

Alara is characterised by purified design, a slim fit that does not reduce comfort, but allows free movement of the body in action, and a restrained colour palette. Alara collection has been recognised in various industries for its functionality, quality of the materials, as well as appearance.

MULTINORM ZAŠTITNA ODJEĆA

Neki radnici su stalno izloženi grubim okruženjima i rizicima koji s njima dolaze. Štoviše, neka od ovih okruženja izlažu radnike spoju više rizika u isto vrijeme. Multinorm zaštita smanjuje rizik od osobne ozljede kroz visoku razinu zaštite.

Kako bismo osigurali da Multinorm odjevni predmeti pruže najvišu zaštitu, naši se odjevni predmeti strogo pridržavaju europskih standarda. Vaš odjevni predmet ima etikete i oznake koje vam govore kojim standardima za zaštitnu odjeću udovoljavaju.

MULTINORM radna odjeća podijeljena je u nekoliko grupa ovisno o vrsti i stupnju rizika kojem su radnici izloženi: EXTREME, HIGH, REGULAR.

EN ISO 11612

EN 61482-1-2

EN ISO 11611

EN 13034 type 6

EN 1149-5

EN 20471

MULTINORM PROTECTIVE WEAR

Some workers are constantly exposed to harsh environments and risks that come with them. Moreover, some of these environments expose workers to multiple risks at the same time. Multinorm protection reduces the risk of personal injury through a high level of protection.

To ensure that Multinorm clothing items provide the highest protection, they strictly adhere to European standards. Our clothing items have labels and symbols that tell you what standards of protective clothing they meet.

MULTINORM work clothing is divided into several groups, depending on the type and degree of risk the workers are exposed to: **EXTREME, HIGH, REGULAR.**

LACUNA MULTINORM ZAŠTITNA ODJEĆA

Multinorm znači mnogo normi - a to je upravo što Lacuna Multinorm jest! Asortiman Lacune nudi optimalnu zaštitu, udobnost i funkcionalnost za one koji su izloženi surovim okruženjima i rizicima koji s njima dolaze.

Neki radnici su stalno izloženi grubim okruženjima i rizicima koji s njima dolaze. Štoviše, neka od ovih okruženja izlažu radnike spoju nekoliko rizika u isto vrijeme. Multinorm zaštita ograničava moguće opasnosti od pojavljivanja niza rizika te smanjuje rizik od osobne ozljede kroz visoku razinu zaštite.

Kako bismo osigurali da Multinorm odjevni predmeti pruže najvišu zaštitu, naši se odjevni predmeti strogo pridržavaju europskih standarda navedenih u ovom dokumentu. Vaš odjevni predmet ima etikete i oznake koje vam govore kojim standardima za zaštitnu odjeću udovoljavaju.

Zaštita od plamena

Postoje dvije metode proizvodnje sporo gorivih tkanina, a Lacuna Multinorm asortiman nudi odjevne predmete izradene od obje vrste tkanina, kemijski tretiranih tkanina i inherentno sporo gorivih tkanina. Objе vrste Lacuna Multinorm tkanina su izuzetno mekane i udobne - jedva da možete prepoznati da su ove tkanine visoko učinkovite u zaštiti od plamena - jednostavno se čine kao još jedan materijal Lacuna kvalitete. Inherentno sporo goriva tkanina znači da je sama tkanina tkana od sporo gorivih vlakana, tako da je zaštita od plamena ugrađena u tkaninu. Ova svojstva su trajna i ne mogu se "isprati".

Naša kemijski tretirana VO tkanina tretirana je PROBAN®-om, koji nudi dobru zaštitu a tkanina zadržava svoju mekoću i prozračnost. Postoji izravna veza između vlakna i PROBAN®-a, tako da se tretman ne može tijekom vremena ukloniti. PROBAN® ne nestaje niti abrazijom niti pranjem. Tkanine tretirane PROBAN®-om udovoljavaju zahtjevima standarda Oeko-tex 100, razredu proizvoda II (izravan dodir s kožom). Sporo gorive tkanine imaju svojstva koja smanjuju zapaljivost tkanina i/ili ograničavaju širenje plamena. Sigurnost i visoka razina zaštite ono su čemu Lacuna pridaje 100%-tnu pažnju, kako biste vi dobili optimalnu radnu odjeću. Stoga, čvrsto preporučamo da odjevni predmet koristite onoliko koliko je preporučeno i da slijedite upute za održavanje.

LACUNA MULTINORM SAFETY WEAR

Multinorm means many norms - which is exactly what Lacuna Multinorm is! The Lacuna range offers the optimal protection, comfort and functionality for those who work in harsh environments.

Some workers are continuously exposed to tough environments and the risks that come with these. Moreover, several of these environments expose workers to a combination of risks at the same time. Multinorm protection limits the potential threats of a number of these risks, and reduces the risk for personal injury through its high level of protection. In order to ensure Multinorm garments provide the maximum protection, our garments comply strictly with the European standards outlined in this folder. Your garment has labels and hangtags to tell you which protective clothing standards it meets.

Flame protection

There are two different methods for producing flame-retardant fabrics, and the Lacuna Multinorm range offers garments made in both kinds of fabric, chemical treated fabric and inherent fabric. Both of the Lacuna Multinorm fabrics are extremely soft and comfortable – you hardly recognize that these fabrics are high-performance flame materials – they simply feel like one more Lacuna quality material. Inherent fabric means that the fabric itself is woven from flame-retardant fibres, so the flame protection is built into the fabric. These properties are life-long, and cannot be "washed out".

Our chemically treated FR fabric is treated with PROBAN®, which provides good protection and still lets the fabric keep its softness and breathability. There is a direct link between the fibre and PROBAN®, so the treatment cannot be removed over time. Neither abrasion nor washing can make PROBAN® disappear. PROBAN® treated fabrics meet Oeko-tex 100 requirements, product class II (direct skin contact). Flame-retardant fabrics have properties that reduce the flammability of the fabrics and/ or limit the flame spread. The safety and high level of protection are the 100% focus for Lacuna, to give you the optimal workwear. Therefore, we strongly recommend you only use the garment for its recommended life and you follow the care instructions

NORME STANDARDS

EN ISO 11612

Zaštitna odjeća certificirana u skladu s normom ISO 11612 štiti od kratkog doticaja s toplinom i plamenom. Norma je podijeljena u različite kategorije, gdje kodne oznake označavaju koje zahtjeve za zaštitu od topline i plina odjevni predmet ispunjava. Svaka kategorija dodatno je podijeljena u različite razine, ovisno o razini zaštite.

- (A1) Ograničeno širenje plamena
- (A2) Ograničeno širenje plamena, opšiveni uzorci
- (B) Konvektivna toplina, stupnjevi 1-3 gdje je 3 najbolji
- (B) Radijacijska toplina, stupnjevi 1-4 gdje je 4 najbolji
- (D) Prskanje lijevanog aluminija, stupnjevi 1-3 gdje je 3 najbolji
- (E) Prskanje lijevanog željeza, stupnjevi 1-3 gdje je 3 najbolji
- (F) Kontaktna toplina, stupnjevi 1-3 gdje je 3 najbolji

Protective clothing certified to ISO 11612 protects against brief contact with heat and flame. The standard is divided into different categories, where the code letters indicate which heat and flame requirements the garment fulfils. Each category is subdivided into different levels, depending on how good the protection is.

- (A1) Limited flame spread
- (A2) Limited flame spread, hemmed specimens
- (B) Convective heat, scale 1-3 where 3 is the best
- (C) Radiant heat, scale 1-4, where 4 is best
- (D) Molten aluminium splash, scale 1-3 where 3 is the best
- (E) Molten iron splash, scale 1-3 where 3 is the best
- (F) Contact Heat, scale 1-3 where 3 is the best

EN ISO 11611

Zaštitna odjeća certificirana u skladu s normom ISO 11611 pruža zaštitu od prskanja (male kapljice lijevanog metala) i kratkog kontakta s plamenom.

Klasa 1 - štiti protiv manje opasnih zavarivačkih tehnika i situacija, koje uzrokuju niže razine prskanja i radijacijske topline

Klasa 2 - štiti protiv manje rizičnijih zavarivačkih tehnika i situacija, koje uzrokuju više razine prskanja i radijacijske topline

- (A1) Ograničeno širenje plamena
- (A2) Ograničeno širenje plamena, opšiveni uzorci

Protective clothing certified to EN 11611 provides protection against spatter (small splashes of molten metal) and brief contact with flame.

Class 1 - Protects against less hazardous welding techniques and situations, causing lower spatter and radiant heat

Class 2 - Protects against riskier welding techniques and situations, which causes higher levels of spatter and radiant heat

- (A1) Limited flame spread
- (A2) Limited flame spread, hemmed Specimens

EN 1149-5

Zaštitna odjeća certificirana u skladu s normom EN 1149 pruža zaštitu protiv elektrostatičkog elektriciteta i ograničava mogući rizik od zapaljenja. Odjevni predmet je potrebno koristiti kao dio uzemljenja električnog sustava kako bi se spriječilo nastajanje iskri.

Protective clothing certified to EN 1149-5 provides protection against electrostatic build up and limits the potential risk of ignition. The garment should be used as a part of an earthed electrical system to prevent sparks.

EN 61482-1-2

Zaštitna odjeća certificirana u skladu s normom EN 61482-1-2 pruža zaštitu od toplinskog učinka električnog luka. Ova norma pokazuje da li odjevni predmet štiti od toplinskog učinka električnog luka i dijeli se u klase.

Klasa 1 - Zaštita od toplinskog učinka električnog luka 4kA
Klasa 2 - Zaštita od toplinskog učinka električnog luka 7kA
Odjevni predmet se testira pri naponu električnog luka od otprilike 400 V s dužinom luka od 500 ms.

Protective clothing certified to EN61482-1-2 provides protection against the thermal hazards of an electric arc. The standard tells if the garment protects against electric arc and it is divided into classes.

Class 1 - Protection against electric arc 4kA
Class 2 - Protection against electric arc 7kA

The garment is tested at an arc voltage of up to approximately 400 V with an arc duration of 500 ms.

EN 13034 type 6

Zaštitna odjeća certificirana u skladu s normom EN 13034 pruža zaštitu od tekućih kemikalija i namijenjena je za uporabu ako su rizici procijenjeni kao niski i nije potrebna potpuna nepropusnost za tekućine, tj. kad osobe koje nose odjeću mogu na vrijeme poduzeti odgovarajuće radnje ako njihova odjeća postane kontaminirana. Niski rizici mogu biti potencijalna izloženost malim količinama raspršene tekućine ili slučajno prskanje, u malom obujmu.

Protective clothing to EN 13034 provides protection against liquid chemicals and is intended for use if the risks are assessed as low and a full liquid permeation barrier is not necessary, i.e. when wearers are able to take timely adequate action if their clothing becomes contaminated.

Low risks could be a potential exposure to small quantities of spray or accidental, low volume, splashes.

EN 20471

Zaštitna odjeća certificirana u skladu s normom ISO 471 pruža visoku vidljivost u opasnim situacijama tijekom cijelog dana. Zahtjevi su postavljeni za osvjetljenost i refleksiju. Odjevni predmet je certificiran s obzirom na površinu vidljivog površinskog materijala

Protective clothing certified to EN 471 provides high visibility in dangerous situations during all hours of the day. Requirements are set for luminance and reflection. The garment is certified relative to the area of visible surface material.

LACUNA
CORPORATE

CORPORATE WEAR

Kod radnika u servisnim industrijama profesionalan i elegantan izgled posebno je važan.

Zbog toga je njihova odjeća izrađena od tkanina koje svojim svojstvima doprinose lijepom i profesionalnom izgledu čak i nakon dugotrajnog nošenja i ponovljenih pranja.

TenCate tkanine jedinstvene su po svojoj bijeloj boji i blistavosti, a dostupne su u paleti modernih i industrijskih boja koje ostaju potpuno postojane nakon pranja. Na taj način tkanine zadržavaju svoj profesionalni izgled.

CORPORATE WEAR

For workers in service industries, a professional and elegant look is particularly important. Because of this, their clothes are made of fabrics that contribute to their appealing and professional appearance, even after prolonged wear and frequent washing.

TenCate fabrics are unique for their white colour and brilliance and are available in a palette of modern and industrial colours that remain completely intact after washing. In this way the fabrics retain their professional look.

LACUNA CORPORATE

TenCate KG317 215g/m2 65%pes 35%pamuk

Lacuna Corporate odjeća izrađena je od TenCate tkanina koje svojim svojstvima doprinose profesionalnom izgledu.

Tijekom više desetljeća, TenCate Tecawork – KG 317 tkanine nosile su tisuće ugostiteljskih, medicinskih i zdravstvenih djelatnika, svakodnevno. Klijenti su zadovoljni kvalitetom TenCate materijala: proizvodi se najsvjetlija i najtrajnija bijela tkanina, gotovo neprozirna za tako laganu tkaninu te s visokom razinom otpornosti na gužvanje čak i u uvjetima industrijskih praonica. To su samo neki od razloga zbog kojih te tkanine imaju široku primjenu u izradi radne odjeće za ugostiteljske objekte, dječje vrtiće, liječničke ordinacije i bolnice. TenCate podvrgava TenCate Tecawork™ – KG 317 tkanine strogim ispitivanjima kvalitete. Ispunjeni su svi standardi koje je postavilo Europsko udruženje proizvođača tekstila (eng. European Textile Services Association- ETSA). To znači da ne postoje ograničenja u smislu primjene tkanina te su provedena ispitivanja vezana uz: čvrstoću, skupljanje te otpornost na gužvanje i trošenje. Uz ovakve rezultate provedenih ispitivanja, možete biti sigurni da su tkanine vrlo prikladne za radnu odjeću koja se održava u industrijskim praonicama rublja.

TenCate Tecawork tkanine ostvaruju najbolje rezultate u sljedećem:

- Otpornost na gužvanje
- Čvrstoća
- Otpornost na trošenje
- Promjenu boje nakon pranja (75°C)
- Otpornost boje na blijedenje
- Otpornost boje na tragove znojenja

TenCate KG317 215g/m2 65%pes 35%cotton

Lacuna Corporate garments are made of TenCate Tecawork fabrics which thanks to its impressive properties contribute to a professional look.

For many decades, the TenCate Tecawork – KG 317 fabrics have been worn by thousands of food, health and medical professionals, day after day. Customers take satisfaction at the quality of TenCate materials: the brightest and most durable white fabric is produced, with a low translucency for such a lightweight fabric and with a high crease resistance even in industrial laundering conditions. These are just a few reasons why this fabric is widely used in catering and hotel industry as well as in medical care garments for hospitals, nurseries and medical practices. TenCate subjects the TenCate Tecawork™ – KG 317 fabrics to highly stringent tests. All the requirements established by ETSA (the European Textile Services Association) are full led and the highest ranking is achieved. This means that there are no limits to what the fabrics can be used for, and that they have been evaluated on strength, shrinkage and resistance to pilling or abrasion. With these test results, you can be sure that the fabric is highly suitable for garments intended for the industrial laundry process.

TenCate Tecawork fabric achieves the highest score in:

- Resistance to pilling
- Strength
- Abrasion resistance
- Colour change after laundering (75°C)
- Colour fastness to bleaching
- Colour fastness to perspiration/sweating

Koja je moja veličina?

Koristite se standardima veličina i ispravno naručite!

OPSEG PRSA: na najširem mjestu

OPSEG STRUKA: stavite metar (ne pretijesno) oko struka

OPSEG BOKOVA: na mjestu gdje su vam bokovi i stražnjica najširi

DULJINA RUKAVA: od ramena cijelom dužinom ruke do zgloba

DULJINA NOGAVICE: od struka preko bokova do tabana

OPSEG VRATA: stavite metar (ne pretijesno) na donji širi dio vrata

What is my size?

Use a standard size and the correct order!

CHEST SCOPE: the widest area

WAIST SCOPE: Put a meter (not too tight) around the waist

HIPS SCOPE: where the hips and buttocks are widest

SLEEVE LENGTH: From shoulder, down the entire length of the hand, to wrist.

LENGTH OF PANTS: from the waist through the hips and feet

SCOPE OF NECK: Put meter (not too tight) on the lower wider part of neck

BROKULA

Brokula proizvodi nastali su od prirodnih, organskih i održivih materijala:

Organski pamuk – pamuk uzgojen isključivo ekološkim procesima, od ne genetski modificiranih biljaka, bez korištenja ikakvih sintetskih kemikalija (gnojiva i pesticida).

Lyocell Tencel Sun (UV zaštita) – vlakno izrađeno od prirodne sirovine (pulpe) drveta, 100% biorazgradivo.

Dodatak pigmenta minerala, osigurava dugoročnu zaštitu od štetnog UV zračenja. Učinak zaštite je postojan i nakon učestalog pranja i utjecaja vlage.

Elastan ili Lycra – u sastavu materijala maksimalno prisutno sa 4%, sintetičko vlakno koje materijalima produžuje trajnost/nošenje.

“Green mark” – jamstvo ekološke i društvene osviještenosti i djelovanja sa stvarnim ekološkim učincima.

Društvena odgovornost – doprinos održivom razvoju – odgovorno djelovanje u svim fazama poslovanja u odnosu na društvo, životnu sredinu i prirodu.

Boje za pletivo – ne sadrže kemijska sredstva štetna za kožu.

Boje za tisak – proizvedene u skladu s najvišim ekološkim standardima, ISO 14001 i Oeko-Tex Standard 100.

BROKULA

Brokula products are made out of natural, organic and sustainable fabrics.

Organic cotton – cotton cultivated exclusively with ecological processes, not from genetically modified plants, without any synthetic chemicals (fertilizers or pesticides).

Lyocell Tencel Sun (UV protection) – the fiber manufactured from the natural raw (pulp) of wood, 100% biodegradable. With the addition of mineral pigments, the fiber ensures a long-term protection from the harmful UV rays. The protection effect is stable even after frequent washing and in high humidity.

Elastane or Lycra – the maximum of 4% in the material contents, a synthetic fiber that extends the duration/ wear time for the fabric.

“Green Mark” – a guarantee of the ecological and social awareness and actions with real ecological effects.

Social responsibility – a contribution to the sustainable development, socially responsible actions in all business phases in relation to the society, living environment and the nature.

Fabric dyes – do not contain chemical agents damaging for the skin.

Print dyes – produced in accordance with the highest ecological standards, ISO 14001 and Oeko-Tex Standard 100.

TEHNIČKE ZNAČAJKE MATERIJALA

TECHNICAL PROPERTIES OF OUR MATERIALS

VODOODBOJNOST
Svojstvo tkanine da ne upija vodu, brzo se suši.

HYDROPHOBIC
Performant fabric which do not absorb water and easens drying after washing.

VARENI ŠAVOVI
Tehnika varenja čini šavove savršeno vodootpornim.

WELDED SEAMS
Hot welding technique making the seams perfectly waterproof.

PROZRAČNOST
Svojstvo tkanine što omogućuje da vlaga tijela izlazi kroz tkaninu.

BREATHABLE
Material which allows the body's moisture to get through the fabric.

VODONEPROPUSNOST
Omogućuje odbijanje vode, ulja i prljavštine od tkanine. Tekućina se kreće po tkanini bez prodiranja u istu.

WATERPROOF
Finishing process which enables a fabric to resist penetration by water in its liquid form, or by oil or dirt. Liquids run off the fabrics without penetrating it.

MEKOĆA
Tretman brušenje odjeći daje mekoću te odaje osjećaj baršuna.

SOFTNESS
A brushing treatment on the garment which confers an incomparable softness (velvet feeling).

ANTI PILLING
Završni postupak koji sprečava vlakna da se odvoje i oblikuju pahuljice na površini proizvoda. Time im daju bolju otpornost na pranje i korištenje.

ANTI PILLING
Specific finish treatment, which prevents fibres to separate and to form fluffs on the surface of the product, thus it gives a better resistance to washing and usage.

PREMAZ
Nanos slojeva (poliuretana, PVC-a) na tkaninu, omogućuje materijalu da ostaje vodonepropusan.

COATING
Application of a product (polyurethane, PVC...) on a fabric, allowing the material to become waterproof.

INDUSTRIJSKO PRANJE
Visoko kvalitetna odjeća testirana i spremna za industrijsko pranje

Workwear tested and prepared for industrial washing-it is suitable for high quality requirements.

NORME

STANDARDS

EN ISO 13688

ZAŠTITNA ODJEĆA - OPĆI ZAHTEVI PROTECTIVE CLOTHING -- GENERAL REQUIREMENTS

ISO 13688: 2012/ - Zaštitna odjeća - Opći zahtjevi/ specificira opće uvjete performansi za ergonomiju, dizajn i udobnost, način označavanja veličina, kompatibilnosti i obilježavanje zaštitne odjeće. Uključuje opće informacije i simbole održavanja koje se isporučuju od strane proizvođača zaštitne odjeće.

ISO 13688: 2012

Protective clothing -- General requirements/ specifies the general requirements of performance in ergonomics, design and comfort, marking size, compatibility and marking of protective clothing. Includes general information and symbols maintenance to be supplied by the manufacturer of protective clothing.

EN 343

ZAŠTITA RADNE ODJEĆE OD KIŠE

Norma se sastoji od niza metoda testiranja materijala i šavova odjeće namijenjene zaštiti od vode, magle i vlage.

Metode su: otpornost na prodor vode (prije i nakon testiranja), snaga isparavanja, vlažna čvrstoća, otpornosti na cijepanje šavova i promjene dimenzije odjeće.

Certificirana odjeća, označena je posebnim piktogramom:

X : otpornost na prodor vode (1-3)

Y : snaga isparavanja (1-3)

PROTECTION AGAINST RAIN FOR PROTECTIVE CLOTHING

This standard sets the requirements and test methods applicable to materials and seams of clothing for protection against the weather, fog and soil moisture.

The tests are: resistance to penetration of water (before and after treatment), evaporative strength, tensile strength, resistance to the tear resistance of the seams and dimensional changes.

Certified clothes are marked by a specific pictogram:

X : resistance to penetration of water (1-3)

Y : evaporative resistance (from 1 to 3)

EN 14058

ODJEĆA NAMIJENJENA ZAŠTITI OD HLADNOĆE

Hladnu klimu karakterizira kombinacija vlage i vjetra s temperaturom do -5°C.

PROTECTION AGAINST COOL ENVIROMENTS - CLOTHING

Cool climate is an environment generally characterized by a combination of humidity and wind at a temperature of -5°C and more.
